Re: Revision of the Commission's Rules To Ensure Compatibility with Enhanced 911
Emergency Calling Systems, CC Docket 94-102, TTY Compatibility with Digital
Wireless Systems

Dear Ms. Salas:

Lucent Technologies Inc. ("Lucent") is an active participant in the TTY Forum, which is developing standards to ensure compatibility between digital wireless systems and TTY devices. Due to an administrative scheduling problem, Lucent missed the October 10, 2001 deadline for submitting information to the TTY Forum for inclusion in the TTY Forum quarterly update. Accordingly, Lucent submits the following information regarding our TTY efforts directly to the Commission.

Lucent began First Office Application ("FOA") testing of our TTY solution for CDMA on October 8, 2001. Lucent completed CDMA FOA testing on October 9, 2001. Lucent has completed development of our TTY solution for TDMA, but has not yet completed testing.

Lucent is strongly committed to developing TTY solutions for our products and will continue working towards this goal. If you have any questions, please contact me at (703) 873-1077.

Sincerely,

Diane Law Hsu
